Enhancing your Starfleet Medical Role

To assist in exposing members of STARFLEET International (SFI) to the wide range of medical related academy courses available, a series of 10 CORE training levels have been created. Each core level is comprised of ten (10) courses, giving a total of 100 courses to be completed.

Any member of SFI, who affiliates with Starfleet Medical may participate in these training levels.

The levels must be completed in order, commencing with level one (1), and certification in each level is available by submitting a completed training record application (see Appendix A).

While these core levels have all been named, no inference should be taken that a member wishing to serve STARFLEET Medical in any role needs to complete the courses at the level that shares their title.

The courses that comprise the core training levels are detailed in the following pages, and the process for submitting records for certification is detailed in Appendix B.

The advice and guidance of STARFLEET Academy Directors in identifying the most relevant courses is much appreciated.

It is hoped to be able to expand this programme into specialisms, to reflect what would happen in a real-life context. Any suggestions for subject areas to be covered should be sent to the SFMedical Chief of Operations, who oversees this programme.

APPENDIX B

STARFLEET Medical Training Records Application Process

Once completed fully, the MTRA should be sent via email to sfmedical.training@gmail.com

The MTRA MUST be accompanied by either of the following:

1. Screenshot(s) from the SFI database confirming the exams required have been passed
2. Copies of certificates/emails from course directors for exams not entered onto the database.

Without accompanying evidence of all ten (10) exams per level, certification cannot be completed and issued.

Once verification and certification are complete, a certificate of completion will be sent to the applicant, and will also be posted on the SFMedical Facebook Group.

A record of the certification will be maintained centrally by SFMedical Operations staff.
